

Odeyemi Samuel Ejiro

Frontend Developer • Ibadan, Nigeria

samuelodeyemi122@gmail.com • 09162890899 • github.com/ejiro2002 • linkedin.com/in/samuel-ejiro-2a3bb826a

SUMMARY

Front-end developer focused on building accessible, responsive interfaces and clean product landing pages. I turn design and product goals into fast, usable web pages using semantic HTML, modern CSS, and JavaScript. I prioritize accessibility, clarity and conversion-oriented layouts for portfolio and product sites.

SKILLS

- HTML5, CSS3, JavaScript (ES6+)
- Responsive & mobile-first design, semantic HTML, accessibility (ARIA)
- Styling: Tailwind CSS and custom CSS
- UI/UX: component-driven layouts, hero/content hierarchy, CTA optimization
- Tools: Git, deployment to static hosts (Vercel), basic prototyping

SELECTED PROJECTS

PeacePage — Personal / Portfolio Site

Repo: github.com/ejiro2002/PeacePage

- **Live:** peace-okakpu-digital-marketing-exec.vercel.app
- A polished, brand-focused portfolio and marketing site built with semantic HTML and Tailwind CSS.
- Accessible navigation (skip link, ARIA attributes), responsive hero, services grid, and contact module with clear CTAs.
- Design choices focused on brand color system, typography and conversion flows.
- **Tech:** HTML, Tailwind CSS, responsive layout, accessibility best practices

Rider-app (Delyva) — Delivery Product Frontend

Repo: github.com/ejiro2002/Rider-app (frontend/index.html)

Marketing and product pages for "Delyva" showcasing booking flows, live order tracking, and an admin dashboard preview.

- Feature sections, trust strip and step-by-step "How it works" flow to communicate product value and reduce friction to demo/booking.
- Mobile-first layout and call-to-action flows to encourage demos and bookings.
- **Tech:** HTML, CSS, JavaScript (static frontend) — prototype product frontend and dashboards

Array-Practice — JavaScript Exercises

Repo: github.com/ejiro2002/Array-Practice

Collection of JavaScript array practice tasks and solutions demonstrating problem solving and use of array methods like map/filter/reduce.

- Demonstrates algorithmic thinking and JavaScript fundamentals.
- **Tech:** JavaScript (ES6+)

EXPERIENCE

Frontend Developer — Experience details to be added.

- Frontend development experience focused on responsive interfaces, semantic HTML, CSS, JavaScript, and accessible UI.

- Additional freelance/contract experience can be added when applicable.

EDUCATION

Education details to be added.
